

## PRODUCT INFORMATION

### SANITIZER

# Triple-Action Multitab

## SANITIZER FOR SWIMMING POOLS & SPAS

An Advanced Sanitizing Tablet with Triple Action Formula

### TRIPLE-ACTION

- ✓ **Sanitizes and Kills Bacteria**
- ✓ **Prevents Algae**
- ✓ **Provides Crystal Clear Water**

### THE TRIPLE-ACTION CHLORINATING TABLET DIFFERENCE

Our **Triple-Action Multitabs** provide one of the most convenient ways available to maintain the safety and clarity of your pool water. Regular chlorinating tablets expend a large portion of their sanitizing power in the oxidation of particulate matter and in fighting algae growth. We have taken the most popular chlorinating compound, Trichlor, and added an algistat and clarifier to provide an amazingly easy way in which to sanitize, prevent algae and maintain crystal clear pool water all with one tablet.

- ✓ **Cost Effective** – Built-in clarifier allows your filter to remove chlorine hungry organic material thereby reducing the amount of chlorine needed to kill bacteria and oxidize wastes.
- ✓ **Increased Algae Prevention** – Built-in algistat prevents pesky algae from getting started so you don't waste chlorine fighting a persistent growth.
- ✓ **Easy to Use** – Our Triple-Action Multitabs are applied weekly into your skimmer basket feeder or floater. That's all there is to it!
- ✓ **Exceptionally Clear Water** – Multi-functional, Triple-Action Multitabs maintain the crystal clear, blue water that you always wanted – all season long.

### EASY TO APPLY

#### WHEN USED IN SKIMMERS:

- When applied through skimmers, initially add one (1) tablet of this product per 10,000 gallons of water or portion thereof. Add additional product as determined by a test kit or test strip to maintain available chlorine levels of 1-3 PPM. Divide the number of tablets evenly for pools with multiple skimmers. This product may be used in plastic skimmers only if skimmer and the piping between skimmer and pump are plastic. Do not add other chemicals through the skimmer when using this product in skimmer as an explosion or fire may result. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

#### ALSO FOR USE IN AUTOMATIC CHLORINATORS:

- This product is also designed to be used in proportioning mechanisms such as automatic chlorinators as a maintenance treatment. Fill unit with this product and, following manufacturer's directions, adjust the feeding mechanism to assure a constant treatment level of 1-3 PPM available chlorine in the pool water. Use a test kit or test strips to monitor chlorine levels. Adjust the feed mechanism as needed. Check and refill the automatic chlorinator as needed. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

### AVAILABILITY

**Triple-Action Multitabs** are available in 5, 25 & 50 lb. pails.
